Policy for Information Security Management Systems according to the requests of ISO/IEC 27001:2013

Polyesterday's Information security management policy is oriented towards providing direction and maintenance from the part of its management regarding information security pursuant to business requests and relevant legal and other contract demands.

Information security management policy provides protection of the entire working of Polyesterday from incidents and unsettled reputation due to:

- **Confidentiality of information** – through protection of unauthorized accession or unauthorized disclosure of information;
- **Information integrity** – through providing integrity, accuracy and resistance on information towards unauthorized modification or annihilation of those information;
- **Availability of information** – through providing business processes continuity in case of incident, i.e. providing availability of information to all concerned.

Polyesterday is committed to founding and maintenance of Information Security Management System via:

- Instigation of employments to venerate and implement this policy as a whole.
- Defining supervisory measures oriented to reducing risks regarding information security.
- Establishing a system for managing incidents in respect to information security
- Constant improvement of processes and activities oriented towards information security.
- Boosting Polyesterday employments awareness about confidentiality protection, integrity and availability of information.

Skopje, April 2018

Director
Filip Spasovski
